

## Kevin M. Kaplan, MD Advanced Arthroscopy/Sports Medicine

Date: \_\_\_\_\_

Rehabilitation Protocol: Biceps Tenodesis
Name: Date:
Diagnosis: Date of Surgery:
<ul> <li>Phase I (Weeks 0-4)</li> <li>Sling immobilization to be worn at all times except for showering and rehab under guidance of PT</li> <li>Range of Motion -PROM → AAROM → AROM of elbow as tolerated without resistance (allows biceps tendon to heal into new insertion on the humerus without being stressed), AROM of shoulder (no restriction)         <ul> <li>Goals: full passive flexion/extension at elbow and full shoulder AROM</li> <li>Encourage pronation/supination without resistance</li> <li>Grip strengthening</li> </ul> </li> <li>Heat/Ice before and after PT sessions</li> </ul>
<ul> <li>Phase II (Weeks 4-12)</li> <li>Discontinue sling immobilization</li> <li>Range of Motion         <ul> <li>Begin AROM of elbow with passive stretching at end ranges to maintain/increase elbow/biceps flexibility</li> </ul> </li> <li>Therapeutic Exercise         <ul> <li>Begin light isometrics with arm at side for rotator cuff and deltoid – can advance to bands as tolerated</li> <li>Begin light resistive biceps strengthening at 8 weeks</li> </ul> </li> <li>Modalities per PT discretion</li> </ul>
<ul> <li>Phase III (Months 3-6)</li> <li>Range of Motion – Progress to full AROM of elbow without discomfort</li> <li>Therapeutic Exercise <ul> <li>Continue and progress with Phase II exercises</li> <li>Begin UE ergometer</li> <li>Begin sport-specific rehabilitation</li> <li>Return to throwing at 3 months</li> <li>Throwing from a mound at 4.5 months</li> <li>Return to sports at 6 months if approved</li> </ul> </li> <li>Modalities per PT discretion</li> </ul>
