

Kevin M. Kaplan, MD Advanced Arthroscopy/Sports Medicine

Rehabilitation Protocol: Posterior Cruciate Ligament (PCL) Reconstruction with Achilles Allograft

Name:	Date:
Diagnosis:	Date of Surgery:
Phase I (Weeks	0-4)
	ring: As tolerated with crutches (may be modified if concomitant posterolateral corner
reconstructi	ion, meniscal repair/meniscal transplant or articular cartilage procedure is performed)
 Hinged Kne 	ee Brace:
o Lock	ked in full extension for ambulation and sleeping (Weeks 0-1)
	ked in full extension for ambulation – removed for therapy sessions (Weeks 1-4)
ANTERIOR I	otion – Weeks 0-1: None, Weeks 1-2: PROM 0-30°, Weeks 2-4: PROM 0-90° (MAINTAIN PRESSURE ON PROXIMAL TIBIA AS KNEE IS FLEXED FROM WEEK 1-4—NEED TO PREVENT SAGGING AT ALL TIMES)
 Therapeuti 	ic Exercises
o Qua	d/Hamstring sets and ankle pumps
	light-Leg Raise with brace in full extension until quad strength prevents extension lag
	abduction/adduction (RESISTANCE MUST BE PROXIMAL TO THE KNEE)
	nstring/Calf stretch - Calf press with theraband progressing to standing toe raises with knee in
full e	extension
Phase II (Week	vs 4-12)
`	ring: As tolerated with crutches discontinue crutch use at 6-8 weeks post-op
_	ee Brace: Weeks 4-6: unlocked for gait training/exercise only, Weeks 6-8: unlocked for all
_	iscontinue brace at 8 weeks post-op
	lotion–Maintain full knee extension–work on progressive knee flexion (Goal of 110° by week 6
•	ic Exercises
_	eks 4-8: Gait training, wall slides (0-30°), Mini-squats (0-30°), Leg press (0-60°)
	eks 8-12: Stationary bicycle (with seat higher than normal), Stairmaster, Closed-chain termina
knee	e extension, Leg press (0-90°), Balance and proprioception activities
Dhasa III (Was	dro 12 () months)
	eks 12-9 months) ring: Full weightbearing with normalized gait pattern
_	otion – Full/Painless ROM
_	ic Exercises
	ance closed chain strengthening exercises, progress with proprioception/balance activities
	ntain flexibility
	in treadmill walking – progress to jogging
O Degi	in treatmin waiking progress to jogging
Phase IV (9 mo	onths and beyond)
o Mair	ntain strength, endurance and function – initiate plyometric program
<u> </u>	in cutting exercises and sport-specific drills
o Retu	urn to sports as tolerated
Comments: AVOID POST-OP WEEK 4	D ACTIVE HAMSTRING ACTIVITY AND ACTIVE KNEE EXTENSION FROM 90-70° UNTIL
Frequency: t	times per week Duration: weeks
